SUMMARY

A highly motivated and results-driven individual with a passion for **innovation, problem-solving, and Artificial Intelligence**. Committed to continuous learning and excellence in every endeavor, with a strong interest in developing **intelligent, adaptive, and human-centered solutions**. Dedicated to bridging the gap between technology and real-world impact through the creation of **next-generation AI-driven systems** that enhance efficiency, scalability, and user experience.

SKILLS

- **Languages & Frameworks:** Python, JavaScript, React.js
- **Databases & Tools:** SQL, MySQL, MongoDB, HTML5, CSS3, DBMS
- **Foundational Skill:** Data Structures and Algorithms, Git, RestAPI
- **Soft Skills:** Problem-Solving, Communication, Collaboration

INTERNSHIP

Full Stack Development intern (Inflow company)

Gained hands-on experience in Java programming through real-world projects during my internship at Inflow Technologies. Worked on frontend and backend development using **ReactJS, Java**, Spring Boot, and Microservices, contributing to scalable applications with features like user authentication, cart management, and order placement. Also earned an IBM certification, enhancing my understanding of full-stack development and modern software engineering practices.

EDUCATION

Bachelor of Engineering (BE)

2021-2025

Computer Science and Engineering at SJC Institute of Technology, Chickaballapur
CGPA: 8.92

PROJECTS

AI-Driven Web-Based Secure File Transfer System

- Developed backend functionalities using **Python** and Flask for secure file processing, encryption workflows, and API integration.
- Developed a **Flask-based web application** for secure file upload, sending, and receiving.
- Implemented **AES & RSA** encryption using **Py Aes Crypt** and **PKCS1_OAEP** for end-to-end file security.
- Integrated an **AI chatbot** using **OpenAI API** for real-time user interaction and support.
- Built a user-friendly interface with proper file handling, validation, and secure storage.

Online book store system:

- Developed a full-stack web application during my internship at Inflow Technologies.
- Built the frontend using HTML, CSS, and Java, with MySQL as the backend database.
- Implemented user registration, login, book browsing, and order placement functionalities.
- Integrated a secure payment gateway for online transactions.
- Created an admin panel to manage products, customers, and orders.

Fresh Mart - E-Commerce Grocery Application

- Developed a web-based platform using **HTML, CSS, and JavaScript** to streamline communication between students and proctors.
- The system enables real-time progress tracking, issue resolution, and academic guidance, fostering a transparent and efficient mentorship process.
- Designed modules for student profile management, secure authentication (using client-side storage/simulation), and automated notifications to enhance engagement and accountability.
- Deployed the application on a static hosting platform (e.g., Netlify/Vercel), ensuring accessibility and reliable performance.

CERTIFICATIONS

- Java certification(Infosys Springboard).
- Deep dive into Python libraries certification(INDOSKILL for INDIA).
- Internship certificate(INFLOW TECHNOLOGIES).
- AWS trained(vinsys ITservices)
